

3 Reasons to Use Preconfigured Solutions for AI Deployment

Don't let skill gaps, deployment complexity, or resource constraints keep you from delivering ROI on AI. By packaging AI solutions built to meet specific industry challenges, Oracle Cloud Infrastructure (OCI) AI Accelerator Packs remove common barriers to AI success.

Common hurdles to AI adoption

Overwhelming technical challenges

You want to launch a new AI initiative, but teams are struggling with complex technical details, such as infrastructure setup and component integration. Limited in-house expertise can delay project timelines even more. Now stakeholders are wondering, "Where's our AI"?

Runaway costs and an inability to grow

Rigid long-term contracts, high premium pricing, and mandatory forecasts create financial risks and commitment barriers. Without a clear way to control costs, your leaders are reluctant to devote the resources needed to build momentum and set up the project to grow.

Stakeholders struggle to see value

Long procurement cycles, infrastructure management challenges, and complex integrations with existing investments prolong time to value. Without an AI adoption strategy for your internal teams and partners, skepticism about AI increases among your leaders.

How OCI AI Accelerator Packs can help

Start with your desired results

Rather than starting with building blocks, determine your ideal outcome. AI Accelerator Packs focus on AI-driven use cases, including smarter routing, personalized search, and proactive customer support, so teams can deploy with confidence.

Deploy without long-term commitments

AI Accelerator Packs let you expand on your terms. Month-by-month access and significant savings on bundled services replace locked-in forecasts and premium pricing. Test ideas, prove AI value, and build momentum.

Turn AI potential into tangible outcomes

With AI Accelerator Packs, you and your partners build on OCI's trusted foundation with AI deployments designed for proven use cases. Easily upskill your teams and integrate new AI solutions with your Oracle applications to achieve quick wins.

CUSTOMER SUCCESS

417% ROI was projected by a top European company for its EV fleet route optimization deployment, thanks to AI Accelerator Packs.

OCI AI Accelerator Packs help increase enterprise adoption of AI

These preconfigured solutions allow for one-click deployment of an entire AI stack, enabling businesses to launch impactful AI applications in minutes rather than weeks or months.
