

Ahead or Left Behind

In a globalized economy, every organization needs to find innovative ways to reduce complexity, simplify IT and manage their physical and financial supply chains effectively. The new normal is more automation, resiliency, flexibility, and agility using latest cutting-edge technologies.

“Supply chain finance is gaining a stronghold globally by delivering more than 50% of the global trade revenue”

Why Transform? Why Act Now? Why Oracle?

Scroll to find out

Why Transform?

Banks can play a significant role in supporting and preserving supply chains by way of structuring commercially and financially integrated Supply Chain Finance funding programs that can help buyers and suppliers to manage risks effectively. Considering the fact, technology is the beating heart of Supply Chain Finance, we see this an opportunity for banks to embrace digitization with a modern solution that can supercharge supply chain financing by leveraging tech innovation.

Yesterday’s technology can’t deliver tomorrow’s supply chain finance

Mind the Gap: What is slowing your corporate customers down today?

- Time consuming, cumbersome enrollment process
- Limited Visibility across accounts payable & accounts receivables
- Disparate & disintegrated solutions
- Intensive documentation
- Manual processes across procure-to-pay & order-to-cash

“While trade finance revenues overall were down 1% year over year in the three months of 2020, income from supply chain finance grew by 3% to 4% globally”

Supply chain financing is surpassing traditional trade financing. With Oracle Banking Supply Chain’s fully digitized processing and real-time analytics, banks can help corporates further optimize working capital and liquidity in their supply chains.

Why Act Now?

To stay ahead of the competition and adapt quickly to today’s market dynamics, you need to take an integrated approach to Supply Chain Finance funding structures by adopting current best practices and future-proof technologies. What’s the key to survival? Simplify, digitize, and consolidate.

Next-generation supply chain finance: Optimize working supply chain capital

New technologies are changing how financial supply chain management operates... Machine Learning (ML), process automation, digital self-service and more. When you invest in a modern platform that provides capabilities across the full spectrum of working capital management, you can access these features and functionality to gain greater business efficiencies and drive value.

“42% of banks have planned to invest in supply chain finance in the next 12 months”

- Ready-made integration adaptors
- Superior omni-channel experience for buyers & suppliers
- Efficient invoice and purchase order management
- Robust risk management
- Smart reconciliation engine
- Powered by Machine Learning
- Quick counterparty enrollment and management

By leveraging ML, the intelligent system allows automatic data capture from scanned invoices thereby reducing labour-intensive manual efforts. The key information from invoices is automatically extracted and processed for funding basis pre-configured financing parameters, allowing up to a 70 % reduction in time and effort for finance processing and invoice management.

Why Oracle?

For decades, Oracle has been partnering with over 600 banks to solve some of their most challenging business problems by using the industry’s most comprehensive and complete application suite for banking. Oracle Banking Supply Chain Finance is a digitized, end-to-end, front-to-back supply chain finance solution that supports the full lifecycle of supply chain finance and factoring across receivables and payables, offering supplier-and buyer-centric financing.

The Oracle advantage : Future-ready supply chain finance

Our criteria are pretty simple - Is it going to do what you need it to do now? Can you count on being able to use it for the foreseeable future without having to do it again?

Built on adaptable micro services, open architecture

Complete automation and straight-through processing

Flexible deployment options – on-premises, on the Oracle Cloud

Single, unified supply chain and factoring platform that spans all supply chain finance products

By digitizing the entire supply chain financing process, banks can now deliver timely alternative financing options and provide quicker approvals. Providing omni-channel portal access, corporate banks can empower their clients with real-time visibility into transactions.
