

GLAS Verified Software Asset Management (VSAM) Program

Verified Partners Providing Software Management Solutions

The Oracle GLAS Verified Software Asset Management (VSAM) Program is a customer-centric offering, designed to empower organizations to gain a better understanding of their Oracle investments and build confidence in their purchasing and deployment decisions through a voluntary, opt-in program.

Through verified partners specializing in Oracle estates, customers can proactively manage their software and license usage and deployment—mitigating risk, streamlining deployments, and ultimately improving overall efficiency while saving valuable time and resources.

Benefits for Customers

1 A friendlier, proactive, and informative approach to software asset management

2 Verified Expertise Partners who are IAITAM certified and specialize in Oracle software

3 Mitigate typical licensing risks and become eligible for 1-year of Audit Reprieve*
(*Subject to approval by Oracle)

4 Voluntary program that allows opting in or out at any time and choosing the verified partner that best complements business objectives

5 Align software needs with IT and business roadmaps (i.e. cloud migration, AI capabilities)

6 Comprehensive management of your software needs

Interested? Get started today and apply for the program.
